Welcome to GigabitNow

GigabitNow
AN ISO FUSION COMPANY

 **GigabitNow**
Internet How It Is Meant To Be

GigabitNow brings over 30 years of Internet connectivity and customer focused experience to Columbus. Although, GigabitNow handles the design and construction of community networks and connectivity solutions as part of its own business, SiFi Networks felt it important to bring the best possible Internet service provider to the city of Columbus and GigabitNow is proud to be of service. In addition to providing turnkey solutions for the design, construction, operation and support of gigabit fiber networks, GigabitNow's parent company IsoFusion provides full-service business and enterprise Internet, colocation, cloud services and more. We are truly one company to deal with that takes care of everything.

Hoosier Fiber Networks is a fiber optic broadband infrastructure provider, responsible for the build out of a fiber-to-the-premise network that is anchored in Bloomington, and serves Columbus, Shelbyville, and Bartholomew County. Hoosier Fiber Networks works with communities across Indiana to close today's digital divide by building reliable fiber infrastructure that will be sustainable for the next 100 years. We specialize in developing, designing, building, financing, maintaining, and operating fiber broadband networks structured as either public private partnerships or privately funded infrastructure projects.

Business Telephone Service

GigabitNow Business Telephone Service

Increased Flexibility and Mobility

Increased Productivity

Highly Reliable Phone Service

Cost-Effective Telephone Service

Experience Our Business-Class Telephone Service

GigabitNow business telephone service offers the flexibility and power your business demands! Our business telephone service can interconnect with your existing PBX or key system, or to a new standalone VoIP business phone service. In most cases you can keep your business's existing local and toll-free phone numbers, or add new ones.

- ☑ Meet and Hold Meetings from Anywhere
- ☑ Forward Your Calls to Any Number, Anytime
- ☑ Unlimited Free Calling in the U.S., Hawaii and Canada
- ☑ Full Class 5 Features, PBX Replacement & SIP Options

Business Telephone Service

GigabitNow Columbus Telephone is now offering Business Phone Service to businesses of all sizes. Customers switching to GigabitNow Columbus Telephone Business Phone Service can see savings of up to 40% over their existing monthly telecommunications expenses.

The transition is easy — you select the number of phones, the toll-free and local numbers you need, and we take care of the rest.

Flexibility and Power!

GigabitNow Columbus Telephone, a proprietary VoIP solution, includes an extensive offering of modern business features including, toll-free and local number options, free long distance within the continental United States, voicemail to email, fax to email, customizable call routing, and many more; making GigabitNow Columbus Telephone the logical choice for all your business telephone service needs.

GigabitNow Columbus Telephone replaces your existing phone company provided local, long distance, and toll-free telephone

services with a Voice Over Internet Protocol (VoIP) based telecommunication solution made available via the same high-speed circuits used for your business data needs. This consolidation of voice and data communications on the same circuits provides the opportunity for significant overall savings.

GigabitNow Columbus Telephone can be interconnected with your existing PBX or Key System, or to new standalone VoIP business phones. In most cases you can keep your business's existing local and toll-free phone numbers, or add new ones. Concerned about quality, or reliability? GigabitNow Columbus Telephone has been a full-service Internet service and communications provider since 1995, and has the networking expertise to keep your voice and data operating at the levels of reliability and quality that you have come to expect for such mission critical services.

Contact our knowledgeable sales team today to find out how we can assist you with all of your telecommunication needs.

For questions or pricing information please call 1-800-315-3509.
